

## Specification :

The whole cable is made of medical grade flame fire-retardant PU material ,Good tensile resistance ,antibacterial and protecting ultrafine conductive wirecore,long lifetime and durable in use .

Waterproof design ,can be wiped disinfection .

CMOS Technology,Low Power consumption ,the lifetime of professional clip is more than 500,000 times , Providing more durability and compatible with all kinds of x-ray machine .

A . High identify ability of dentails and low x-ray dose helps you to diagnose the tooth lesion problems ,making more accuracy .

B. Providing professional connectivity solutions ,all the information can be viewed in different locations .

C. The scintillator makes high-definition images .

D. Fast imaging employing steady acquisition ,saving the filming time and improving work efficiency .

E. Professional image management software to help you manage images easily. efficiency .

F. Two-year warranty ,free to use our latest software for life
